Emerging Technologies

Emerging technologies that
capture, make, store and
move energy at scale.

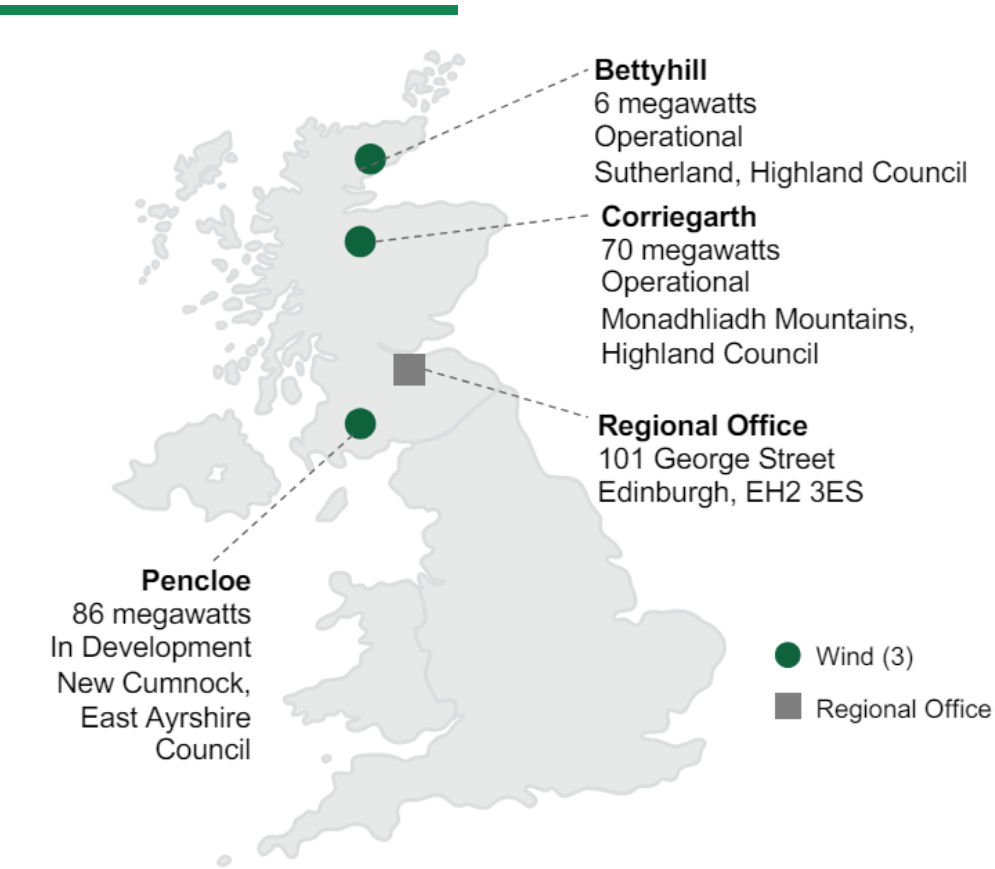

Illuminate USA is an American advanced manufacturing company in Pataskala, Ohio. Illuminate produces bifacial solar panels using some of the most advanced and efficient panel assembly technology in the world. Invenergy launched Illuminate USA in 2023 as a first step towards onshoring the solar supply chain and strengthening energy security.

Invenergy Services

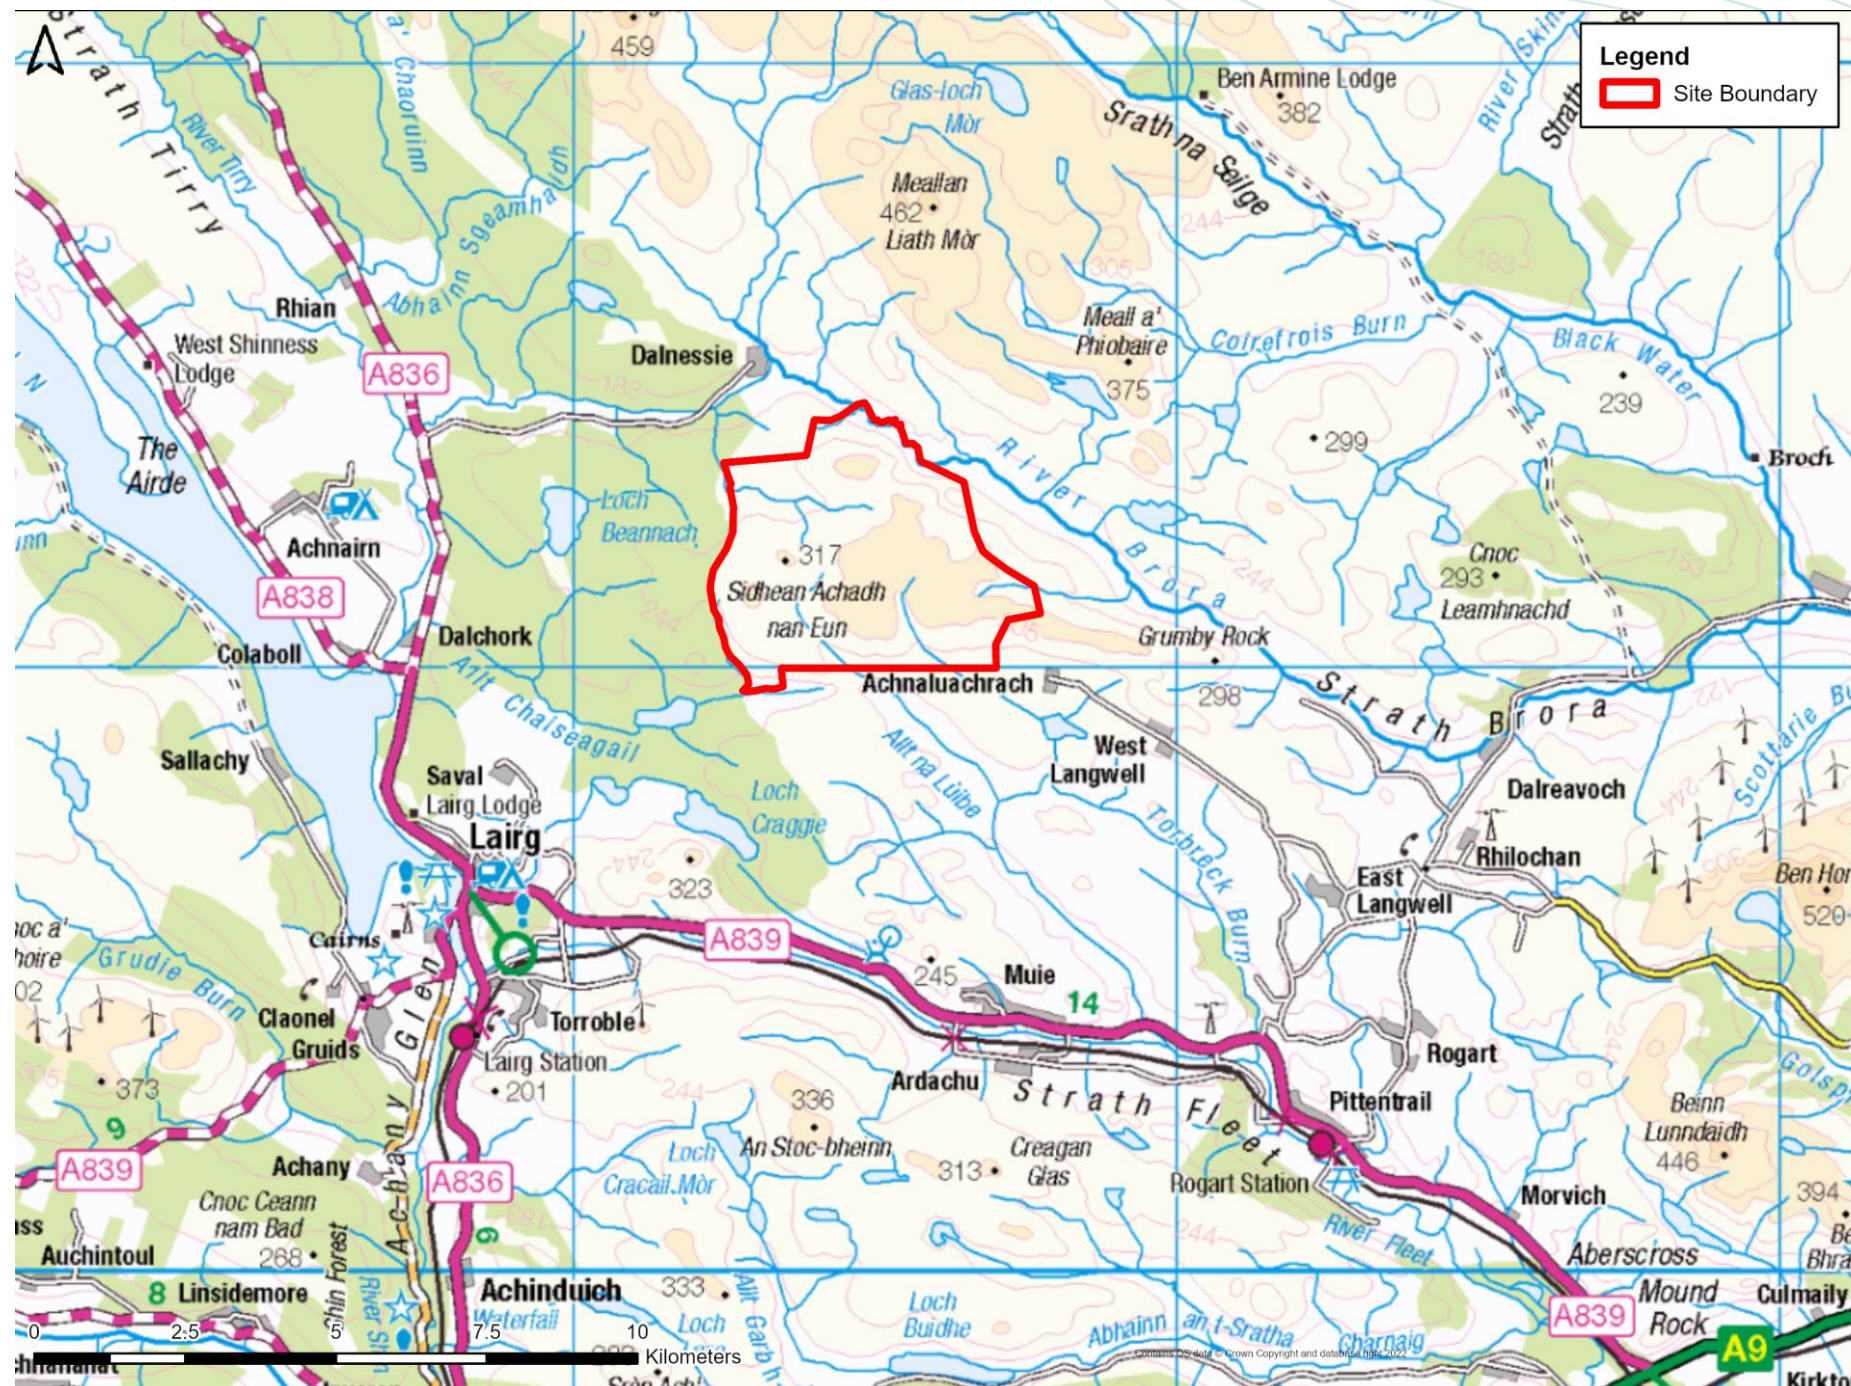

With 20 years of operations and maintenance experience, Invenergy Services operates every energy center we manage as if it's our own. We call it our Owner's Mindset – and that means whether it's day one or years later, we do what it takes to keep our fleet of natural gas, solar, wind and energy storage projects operating with excellence and safety.

Invenergy in Scotland

Creag Dhubh Location

The project is located approximately 7km northeast of Lairg

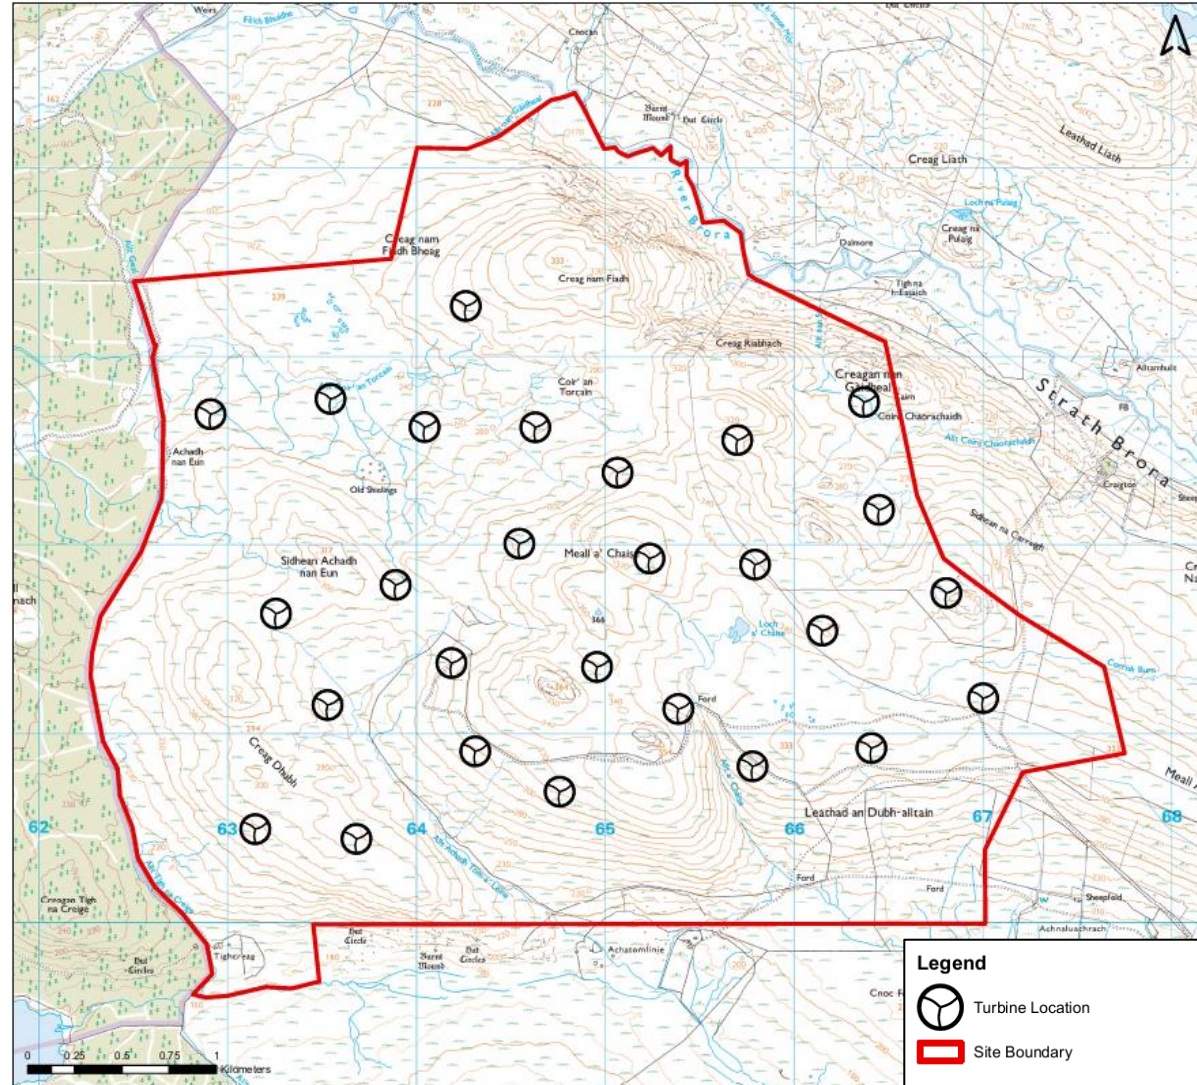

Indicative Layout

27 WTGs

Assuming V162 rated capacity
7.2MW 200m to tip

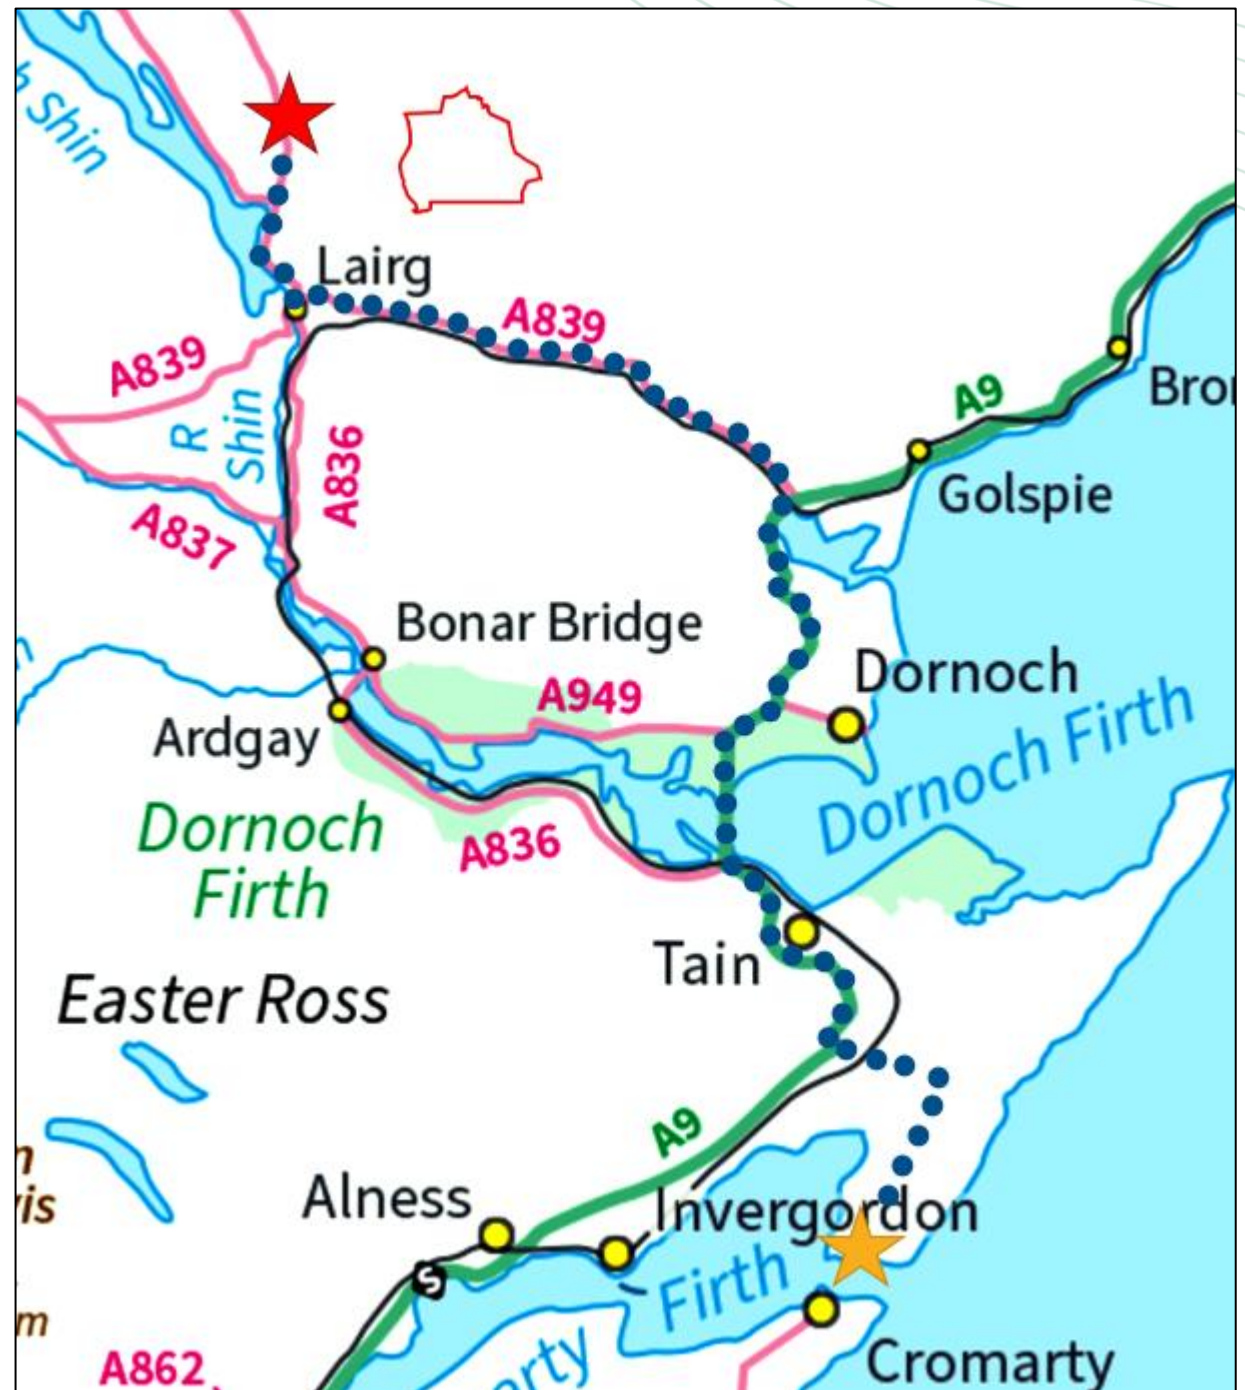

194.4MW total wind capacity

Potential 53.2 MW long duration
energy storage system located
near the project substation

Proposed Access

- ★ Turbine delivery to Port of Nigg
- ... Loads will take the B9175 northbound to the A9 northbound
- ... Loads will exit A9 to the A839 westbound
- ... Loads will exit A839 at Lairg to A836 northbound
- ★ Loads will exit the public road from the A836 using existing forestry roads

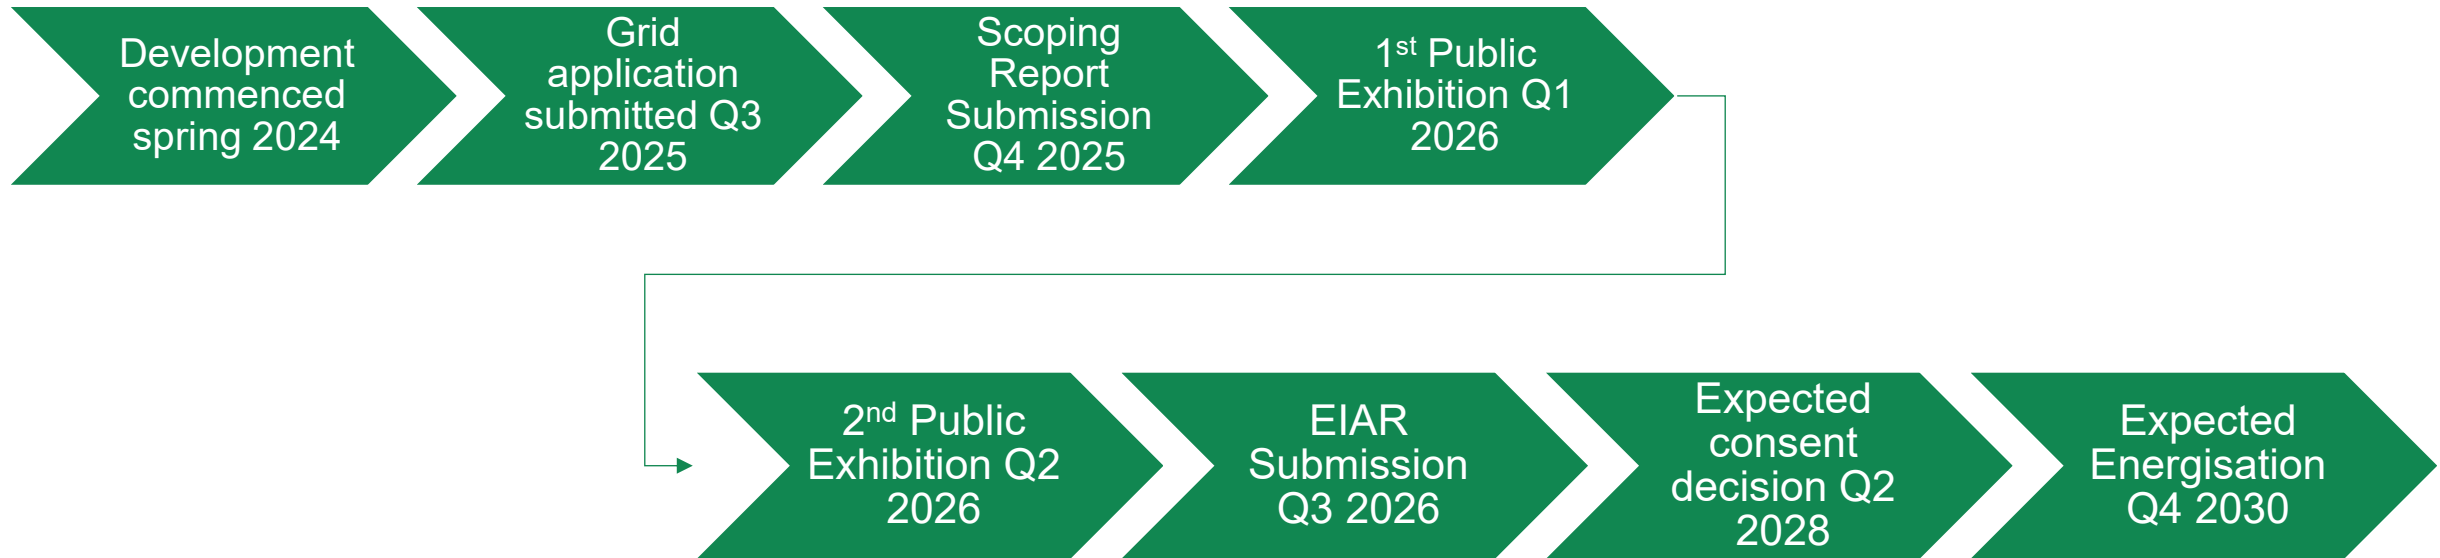

Community Benefit and Engagement

- Onshore wind: £5k MW index linked per annum in operation
- Tailored approach to communities' capacity to manage and allocate funding
- Pencloe Wind Farm 9CC Group Example:
 - Early engager with 9CC Group before formation as registered charity
 - Aim is to pool funds across nine community councils for larger, lasting projects
 - 9CC piloted a job creation scheme with local fire engine manufacturer to increase yearly apprenticeships from three to 20
